

## **Conditions for Granting and Maintaining Certification**

Any Organization seeking Certification by TPL-CB is required to comply with the following requirements

- A documented QMS / EMS as required by the respective standard has to be established, all applicable elements implemented and maintained.
- The effectiveness of implementation is to be verified through at least one internal audit covering all the applicable elements of the standard and one management review.
- Providing the required information to TPL-CB to carry out its certification activities.
- Communicating key changes that can have impact on the certification process.

On completion of above activities, the Organization can inform TPL-CB for organizing the audits. A competent team will carry out audit as per TPL-CB procedures.
